Experience

Transaction & Digital Banking Jun 2026 – Present
Best Finance Company Ltd. (BFC) *Kathmandu, Nepal*

- Developed an Employee Appraisal System using Python, Flask, PostgreSQL, and REST APIs to streamline employee evaluations and grade increments
- Developed a Letter Management System using Flask and PostgreSQL to centralize and manage official company correspondence
- Maintain and enhance the Digital Lending System, focusing on system performance, security, and regulatory requirements within an Agile/Scrum environment
- Develop backend services, database operations, system integrations, and responsive interfaces to support business operations
- Perform functional testing, QA, and troubleshooting to improve system reliability and resolve technical issues
- Contribute to process automation and digital transformation initiatives to improve operational efficiency

Web Developer, Information Technology Feb 2026 – Present
Best Finance Company Ltd. (BFC) *Kamaladi, Kathmandu*

- Develop, maintain, and support web applications and internal IT systems to improve business operations and workflow efficiency
- Collaborate with business and IT teams to identify and resolve technical issues, implement system improvements, and enhance user experience

Freelance Tech Support & QA Specialist Jun 2024 – Aug 2024
Hypen Solution *Remote*

- Performed UAT, functional, and production testing for Android and iOS applications to ensure release readiness
- Tested application builds across multiple devices and platforms, identifying, documenting, and reporting defects before production release

Projects

Concrete Compressive Strength – ML Preprocessing Pipeline | *R, MICE, ggplot2, PCA*

- Developed an R pipeline to clean and prepare concrete strength data for machine learning
- Preprocessed missing data using MICE and identified outliers using the IQR method
- Analyzed feature relationships to identify key factors influencing concrete compressive strength
- Applied Min–Max scaling and PCA to transform and simplify the dataset for analysis

GrocerEase – Multi-Vendor Grocery Marketplace | *PHP, Oracle, JavaScript, PayPal*

- Developed a full-stack multi-vendor marketplace using PHP and Oracle, allowing multiple local traders to sell through a single platform
- Collaborated on designing an Oracle database for managing users, products, orders, and payments
- Integrated PayPal checkout, collection-slot booking, and email OTP verification for secure transactions
- Developed Oracle APEX dashboards for traders and administrators to manage products, discounts, and orders

N & S Handicrafts – E-Commerce Platform | *Laravel, PHP, MySQL, Bootstrap*

- Developed a full-stack e-commerce platform tailored for the Nepalese market with NPR pricing and local address support
- Implemented key shopping features including product filters, live search, wishlist, coupons, and VAT-based checkout
- Built an admin panel for managing products, orders, payment verification, courier tracking, and sales statistics
- Implemented automated transactional emails to keep customers updated throughout the order process

Skills

Programming Languages: Python, SQL, PHP, JavaScript, R, HTML, CSS, Java
Backend & Frameworks: Flask, Laravel 11, REST APIs, Oracle APEX, Bootstrap 5, PHPMailer
Databases: PostgreSQL, MySQL, Oracle Database, Database Triggers, Sequences
Data & Machine Learning: Data Cleaning, Data Imputation, MICE, Outlier Detection, Correlation Analysis, Feature Scaling, PCA, ggplot2
Development Practices & Tools: Agile/Scrum, UAT, QA Testing, System Integration, Git, GitHub, VS Code, PayPal API

Education

The British College Kathmandu, Nepal
BSc (Hons) Computing, Computer Science *Jan 2022 – May 2025*

Uniglobe SS/College Kathmandu, Nepal
Intermediate (+2), Management & Computer Science *2019 – 2021*
