SUMMARY

Backend and web developer at Best Finance Company Ltd., building HR and lending systems with Python, Flask, PostgreSQL and REST APIs in an Agile/Scrum environment. QA background (functional, UAT and production testing), SQL across PostgreSQL, MySQL and Oracle, and data preparation in R (cleaning, MICE imputation, outlier detection, PCA).

EXPERIENCE

Best Finance Company Ltd. (BFC) Feb 2026 – Present
Kathmandu, Nepal

Transaction & Digital Banking team · Jun 2026 – Present

- Developed an Employee Appraisal System using Python, Flask, PostgreSQL and REST APIs to streamline employee evaluations and grade increments.
- Developed a Letter Management System using Flask and PostgreSQL to centralize and manage official company correspondence.
- Maintain and enhance the Digital Lending System, focusing on performance, security and regulatory requirements, in an Agile/Scrum environment.
- Develop backend services, database operations, system integrations and responsive interfaces that support business operations.
- Perform functional testing, QA and troubleshooting to improve system reliability; contribute to process automation and digital transformation.

Web Developer, Information Technology · Feb 2026 – Present

- Develop, maintain and support web applications and internal IT systems that improve business operations and workflow efficiency.
- Collaborate with business and IT teams to resolve technical issues, implement system improvements and enhance user experience.

Hypen Solution · Freelance Tech Support & QA Specialist Jun 2024 – Aug 2024
Remote

- Performed UAT, functional and production testing for Android and iOS applications to ensure release readiness.
- Tested builds across devices and platforms; identified, documented and reported defects before production release.

PROJECTS

Concrete Compressive Strength – ML Preprocessing Pipeline · R, MICE, ggplot2, PCA github.com/Sabin78910/concrete-strength-analysis

- Built an R pipeline to clean and prepare data for machine learning: MICE imputation, IQR outlier detection, Min–Max scaling and PCA; analysed feature relationships to identify key drivers of strength.

GrocerEase – Multi-Vendor Grocery Marketplace · PHP, Oracle, JavaScript, PayPal github.com/Sabin78910/GrocerEase

- Full-stack marketplace for multiple local traders; co-designed the Oracle database (users, products, orders, payments); integrated PayPal checkout, collection-slot booking and email OTP verification; built Oracle APEX dashboards for traders and administrators.

N & S Handicrafts – E-Commerce Platform · Laravel, PHP, MySQL, Bootstrap

- Full-stack store for the Nepalese market (NPR pricing, local addresses, VAT-based checkout) with product filters, live search, wishlist and coupons; admin panel for orders, payment verification, courier tracking and sales statistics; automated transactional emails.

SKILLS

Languages: Python, SQL, PHP, JavaScript, R, HTML, CSS, Java
Backend & frameworks: Flask, Laravel 11, REST APIs, Oracle APEX, Bootstrap 5, PHPMailer, PayPal API
Databases: PostgreSQL, MySQL, Oracle Database, database triggers, sequences
Testing & delivery: QA testing, UAT, functional and production testing, system integration, Agile/Scrum, Git, GitHub, VS Code
Data & ML: data cleaning, data imputation (MICE), outlier detection, correlation analysis, feature scaling, PCA, ggplot2

EDUCATION

The British College, Kathmandu · BSc (Hons) Computing, Computer Science Jan 2022 – May 2025

Uniglobe SS/College, Kathmandu · Intermediate (+2), Management & Computer Science 2019 – 2021
